> More about inRebus Technologies

INREBUS is a service company placed on the market as an effective synthesis between software house, consulting agency, research and development centre. They are specialized in products and solutions for Mobile, Digital Marketing, eLearning, Document & Workflow Management and Video Diagnosis and their target is to give a quick and competitive response to the customers, looking after details in every activity. INREBUS works in turnkey mode and/or in synergy with the customers, providing new ideas for innovative projects and respecting the planned timelines.
