

GOMA ELETTRONICA

> More about GOMA ELETTRONICA

Goma Elettronica is the Italian leading company in the distribution of embedded solutions and the production of custom integrated systems for applications in the defense, transportation, industrial, and research markets.

Goma Elettronica distributes a large catalog of embedded products made by the world-leading manufacturers including COTS systems, integrated platforms, HMI and panel PCs, boards and networking solutions. For those looking for a dedicated product, Goma Elettronica designs and manufactures customized embedded solutions based on standard architectures, integrated with COTS and custom modules, certified and supported over the long term.
