> More about AMET

AMET is a high-tech engineering company, active in mechatronic products design and testing.

AMET distributes products for vehicle dynamics simulation. AMET skills are focused on CAE analysis, automatic controls, and testing.

We work with passion to offer best-in-class solutions, providing the highest professional standards, strengthening day by day a relationship of trust and collaboration with our customers.

Innovation means curiosity and stimulus for updating and growing up. We are investing constantly in Training and Research to offer state-of-the-art technologies and solutions.

We believe in expertise, versatility, commitment, synergy, dynamism. The services we offer go through the knowledge and abilities of our teams.

AMET mainly operates in the aerospace, automotive, smart manufacturing and cleantech fields.
