> More about ALBELISSA

Albelissa was founded in 2005 to cope with engineering and IT needs in the consumer goods industry.

A highly qualified staff of professionals together with the ability to find the right solution for our clients has brought rapid growth. In 2016 we added international recruiting services for our current customers and we also expanded the reach to new customers in new industries.

We also provide customized IT software solutions ranging from IT development, IT support and cybersecurity through our JV in India.

Albelissa mainly operates in the aerospace, automotive, smart manufacturing and cleantech fields.
