

VMS

> More about VMS

Established as an expansion of a technical office established in 1992, VMS supplies the major **international engineering companies**. It is specialized in the **construction of machine tools for grooving males and accessories for the machinery industry**.

Experiences and customers:

- **Grinding machines** for male grooves for local (UFS) and foreign (Sandivk) companies; mechanical/electrical / software design (CN + PLC + HMI), production, assembly, commissioning and testing.
- Design, construction and commissioning of **cableway for freights and people transport** in Macugnaga, Savona, Marmolada, Osimo, Genoa, Etna, Champoluc, Stuttgart Funicular, New York (Roosevelt) plants in collaboration with Agudio / Leitner group.
- **Anthropomorphic robots**, banquets of feeder warehouses, AGVs and related implementations, linear transfers for machining and testing of engine blocks, manual/semi-automatic assembly transfers for various **automotive components** with COMAU group.
- **Automation of energy material production plants** (turbine parts, rotors, etc.): air-oil 8000 rpm milling heads and boring heads with RAM and boring bars of 130 ÷ 220 mm for TONGTAI group ()
- Construction of **rotary tables for pallet handling**, large rotating transfer machines, double-spindle machines, special machines for the production of E-motion structural parts for PCI France and ANGER Maschinenbau
