

MORELLO

> More about MORELLO

MORELLO has become a leader company in the quality hot forging field after 50 years of experience.

MORELLO is specialized in forging production within 5 and 120 kilos in weight, lots of small / medium series and runs to supply the statements which require larger metallurgical and qualitative knowledge, such as railway, aeronautical and heavy vehicles one. The flexibility of working cycle, the timely planning, the steady engagement to respect the strictest quality standards, the control by magnetic particles and the possibility of supplying an end-item of mechanical working, besides by heat-treating, allow constantly to pay attention to customer's requirements.

The quality system certification by DNV is the acknowledgment of the company philosophy which turn to standards observation and customer's requirement satisfaction.
