> More about Asti Aircraft Services

AAS provide advanced solutions for the Supply Chain's optimization, tailored on Customer's needs, with high added value.

LTA - STOCK SUPPORTED AGREEMENTS: the most effective and efficient way to solve Lead Time, MOQ, safety stock, quantity/price sensitive items, related problems.

CONSIGNMENT STOCK: Minimize the storage exposure assuring ideal parts' availability levels for the assembly lines.

KITTING: the composition of specific assembly kits, reduces the lead times and line feeding errors, assuring the components' full traceability.

KANBAN ON-SITE: in line delivery with automatic re-provisioning.

HARD-TO-FIND ITEMS: scouting Service via our experienced suppliers' network.

SELF-RELEASE: AAS has certified trained personnel and optical measure instruments to operate in self-release environments.
