> More about Gruppo EME

EURO MASTER EVOLUTION is for its customers the partner in developing and implementing unique solutions for:

Leather goods: an entire department dedicated to the leather. From single items to large production, we can create any of customer leather ideas. The meeting point between manufacturing experience and latest generation of technological solutions.

Thanks to the experience accumulated over the years and to the freshness of a new internal designer, in 2015 the company created the brand "Alberto Olivero". Its main products are leather accessories, characterized by the sparkling combination of shapes and colors; thought for up-to-date and technological people, who care about fashion and do not depend on trends.

Design & Development: in house experienced engineers and technicians support the clients in designing and implementing customized solutions.

Gruppo EME

Technical Sewing: Euro Master Evolution produces components and finished products in any kind of fabric and leather, PVC, coated or glass fiber fabrics. With a wide range of sewing machines, such as arm and flat machines, edging, bartacking, overlock, twin- needles, it can perform any type of work.

Thermoforming: A production department larger than 3,000 square meters, with presses for hot and cold thermoforming of sound and heat absorbing fabric.

EURO MASTER EVOLUTION mainly operates in the design, railway and automotive field by providing full service in designing and manufacturing of cab and internal of vehicles with a variety of parts such as engine covers (sound and thermal absorbing fabric), seat covers, curtains, ceiling, floor covers, etc.
