

TPS AEROSPACE ENGINEERING

> More about TPS AEROSPACE ENGINEERING

TPS AEROSPACE ENGINEERING S.r.l. is a new concept of engineering house in the aeronautical world, where the combination of experience in engineering, production, technical publishing, and technical training, along with the strength and tradition of a group, comes together to form a hangar for your needs.

Our company is specialized in the design of aeronautical medical systems and the customization of aerial survey and video recording kits.

In summary:

- Defining project requirements;
- Verifying compliance with regulations;
- Feasibility studies;
- Studying and designing avionic, electrical, structural, and medical configurations;
- Static structural analysis and 3D modelling;
- Creation of compliance documentation.

We can support the definition of project requirements as regards structures, avionics, electric and oxygen systems, and internal features, as well as generally anything involving aeronautical regulations.

Our company is specialized in the design of aeronautical medical systems and the customization of aerial survey and video recording kits.
