> More about FERMEC

We are a hot forging and machining company near Turin with 2 production sites. FERMEC srl located in Busano which occupies an area of 4000 sqm, of which 2000 sqm is covered. MECFER srl in Rivara which occupies an area of 10000 sqm, of which 3000 sqm is covered. We machine parts in series according to the customer's design with various CNC turning, drilling and milling machines. We have a hot steel forging department consisting of 3 friction screw presses and another of 5 broaching machines for profiles and internal gears. Our strengths have always been our high-quality machining, our attentive customer care to guarantee the full satisfaction of our customers, together with our constant innovation efforts. We allocate a significant percentage of our revenues in investment to renew our tools and machines to keep them efficient and up-to-date with the technological development. We developed our quality management system following the best practices of the UNI EN ISO 9001:2015 standards.
