> More about BDC Electronic

BDC ELECTRONIC was founded in 1970 as the first Italian manufacturer of proximity sensors. Its ability to meet market requirements has given it increasingly relevant experience in the field. The highly agile organization of the company is able to meet the needs of the customer, ensuring high quality and reliable production, appreciated worldwide. Focusing on research and development allows the company to offer solutions to any kind of problem and to find new applications; its products are engineered to work even in harsh conditions. Product range: atex sensors, inductive sensors, capacitive sensors, magnetic sensors, speed sensors, acceleration sensors, amplifiers & connectors for sensors.
