

ECO-MIND INGEGNERIA INFORMATICA - S.R.L.

> More about ECO-MIND INGEGNERIA INFORMATICA - S.R.L.

Eco-Mind is a software factory specialized in designing and developing business solutions, both mobile and cloud-native. It supports companies that want to adopt innovative solutions to evolve toward the "Anywhere Operations" model by intersecting their needs with research and study of the latest technologies. BMW Italy, BMW Spain, and BMW Portugal adopted Eco-Mind software for the digital signature to automate all signature approval processes facilitating communication, internal and external. The Eco-Mind product suite also includes applications for smart glasses and wearable devices that facilitate the work for on-field operators, such as Eye4Task, an AR remote collaborative platform that provides remote support and assistance with immersive technologies and smart glasses for maintenance, inspection, and certification.
