> More about Novac

Novac is an innovative Italian company dedicated to advancing energy storage technologies, particularly in the automotive and aerospace sectors. We specialize in supercapacitors that are not only high-performing in terms of power density and rapid charge capabilities but also uniquely adaptable, designed to conform to any surface. This flexibility makes Novac's pouch supercapacitors especially suited for the intricate spaces and specific design needs of electric vehicles and aerospace applications. As the only manufacturer of these versatile pouch supercapacitors, we provide bespoke solutions that dramatically enhance the performance and efficiency of applications ranging from fuel cell vehicles to SAR satellite technology. By focusing on the automotive and aerospace markets, Novac aims to lead the way in sustainable technology, shaping the future of energy storage to meet the complex demands of these high-tech industries globally.
