S.P.I. Studio Progettazioni Industriali

> More about S.P.I. Studio Progettazioni Industriali

Since it was established in 1966 in Turin, SPI (Studio Progettazioni Industriali) has been a reliable partner for engineering services applied to industry, mechanics, and mechatronics.

Thanks to the industrial attitude aimed to technological innovation, to R&D investments and to constant updating of the Team, SPI has been able to establish, over the years, its know-how in different industrial fields, also undertaking a solid partnership with companies of different dimensions and structures, such as international groups and local SMEs.

Mechanical and industrial engineering services

- Special Machines
- Service equipment for production lines
- Measurement and certification equipment
- Test benches and inspection equipment
- Assembly equipment
- CNC Part Programs
- Special Plants (lifting and carrying)
- Light, medium, heavy carpentry
