> More about L.M.B.

LMB was founded 50 years ago and it is located in Pianezza, a small town in the northwest of Italy.

Since then, it has been producing mechanical parts, confirming its leadership in this field. The plant is 3,000 m² and has a staff of 30 people.

The skills developed in different fields have improved LMB 's flexibility to undertake new productions.

LMB has been developing a number of high-precision mechanical processes of various materials, such as carbon steels, alloys, Inox, aluminium rod and die casting and it has been carrying out several applications in the field of surface treatments.

Thanks to the cooperation with multinational companies, LMB has developed prototypes to get to series production of actuators and moulds for aerospace, F1, marine, cycle and motorcycle.

The company is equipped with multi-axis machines, EDM, NC programming, CMM control and complete handling of all the processes. Quality system is certified ISO9001.

Main customers: SKF, SNR, LISI-AEROSPACE, SETFORGE, FIVES GROUP, TITAN GROUP.

LMB mainly operates in the aerospace and automotive fields.
