## > More about Tekfer

Neohm was founded in 1990 from the know-how and brand of NEOHM Elettronica.

Our industry produces Analog Circuits, Digital Circuits, Radiofrequency, Power Circuits, Signal conditioning, Sensors, and Custom mechanical solutions.

Today, Neohm works on the design, development, industrialization, production, and sale of electronic components, boards, and systems.

Our products are directed to any user of electronics, regardless of the level of experience, structure, and resources. The main reference markets are aerospace, rail, automotive and industrial electronics.

We develop customized circuits supporting the customer in converting an idea into a "turnkey" product.

Neohm mainly works in the automotive, aerospace and smart manufacturing fields.
