

MOLLE INDUSTRIALI CONTE

> More about MOLLE INDUSTRIALI CONTE

Molle Industriali Conte produces high precision springs for any technologically advanced industrial sector, in particular, compression springs, shaped and sheared springs, tension springs, split bushings with hundredth height control, torsion springs and double torsion springs.

The experience achieved in decades of activity combined with the high quality of the raw materials used guarantees the safety and reliability of its components.

Production and quality are of the highest achievable level thanks to consistent investments supporting a 50-year-knowledge.

Our springs are mainly used in the following industrial applications: mechanics and electromechanics, hydraulics, automotive, aeronautics. The components are used in high-frequency applications.

The constant interaction with the customer during development and project design allows the company to achieve important results in the fatigue life phase.

NADCAP, the process certification for heat treatment, proves that the company plays a premier role in the Aeronautics sector.

Molle Industriali Conte mainly operates in the aerospace, automotive and smart manufacturing fields.
