

FRANDENT GROUP

> More about FRANDENT GROUP

FRANDENT has more than 40 years of experience in producing agricultural machinery and is organised in 2 product divisions: soil working and haymaking. The modern lean manufacturing plant, based close to Turin, provides high capacity production of power harrows, tedder spreaders and rotary rakes.

FRANDENT manufacture products of high quality and extreme durability for all agricultural sectors and environments.

Our specific sectors of activity are wine growing, zootechnics, agriculture and gardening.
