

MASSANO A. DI MASSANO VALERIO & C.

> More about MASSANO A. DI MASSANO VALERIO & C.

MASSANO is a family-run company settled in Savigliano (Cuneo). It designs and produces for over 30 years a wide range of machine for land working to satisfy all the customers' needs. As a matter of fact since 1950s MASSANO'S aim is to be the best expert in the customization of agricultural machinery for soil's preparation.

Its main products are the stone buriers both with rear roller and with bed former shaper. Thanks to their innovative working principle and the rotor's counter rotation they can bury stones, clods and vegetable residue in only one pass reducing the germination time, improving the ability of the soil to drain and increasing the production yields.

These equipments can be used in every type of soil in agriculture, horticulture, vineyards, orchards and gardening and they are addressed to little, medium and large companies.

In addition to the stone buriers MASSANO produces also twin rotor machines, rotary tillers, subsoilers and discs harrows.

The perseverance to pursue its goal and the high quality products have allowed MASSANO to be one of the most important worldwide leader in the market and to achieve almost unattainable niches' market.
