PASCAL

> More about PASCAL

Pascal Srl was founded thanks to the passion and experience of its founders, in particular the Branciaroli family, former founders of the Panna Elena brand (now sold to the Parmalat Group), which has been dedicated to the world of dairy products for over seventy years. Pascal Srl combines a love of tradition and its roots with a commitment to innovation and research in order to offer innovative, high quality products to private individuals and professional categories.

The product lines of Pascal Srl are: "La Panna di Pà", which is characterised by its ease and speed of preparation, thanks to the innovative production process without the need for thickeners and/or emulsifiers; "La Ricetta del Gelato di Pa", a UHT liquid-based mixture that represents a unique, long-life product, which has the same flavour as artisanal ice cream and guarantees a high quality product; "I Dessert di Pa", a new line of spoon desserts, made with natural products and in accordance with traditional recipes, ready for consumption.
