

ABBA'

> More about ABBA'

ABBA' Company is located in the town of Centallo, Cuneo district, in the North West of Italy.

It was originally founded in 1975 by Giuseppe Abbà, who decided to maximize his experience in marketing products for plant protection starting producing specific articles for spraying and weeding.

Now, at the helm of the company, beside the founder, there are his sons: Davide, the Production Manager and Federica, the Administrative Manager.

Over the years the company has expanded its manufacturing capabilities to meet the needs of the farmers. The use of more and more corrosive chemicals and the big problems of drift and environmental pollution, induced the company to improve the quality of the treatments. The focus is to increase the harvest, decreasing the cost production, reducing the air pollution and protecting the water resources and the health of human beings, animals and flying animals.

ABBA'

The company offers a wide range of specific products for every kind of treatment, such as weeding machines with mechanical and hydraulic booms, booms for vineyards, trailed and mounted sprayers, weeding plants for seeders, irrigation pumps.

Moreover it resells the high quality ASJ nozzles, produced by the ASJ company, ABBA' family's property belonging to the Arag group, world leader manufacturer of agricultural accessories.
