

DISTILLERIA BECCARIS ELIO

> More about DISTILLERIA BECCARIS ELIO

DISTILLERIA BECCARIS was established thanks to a sort of "game of chance". In fact, in 1951 its founder Elio BECCARIS decided to start its own firm, but he did not know whether it had to be a distillery, a winery or a vinegar factory. So he made his new-born son Carlo decide by putting three slips of paper with the three alternatives in a hat and letting him take one, the ultimate decision should be taken by his innocent and unaware hand and it proved to be the lucky one.

Carlo BECCARIS now shows in his personality the same rare and essential characteristics of seriousness of his firm, handicraft care and passion, originating high quality. The production cycle starts at the end of the summer with the selection of the best marcs from the vineyards located in the heart of the region between Langhe and Monferrato.

The guideline of DISTILLERIA BECCARIS is very simple: use the right raw materials and you will obtain good grappa and the right raw materials are supplied by Mother Nature: the marcs of Moscato, Nebbiolo, Barbera, Dolcetto, just to mention only some of them, are excellent. Then the process involves experience and ability, these qualities together with the human touch are the secret gathering with the same passion people of different generations.
