## > More about GINOX

Ginox produces any type of stainless steel fittings on custom design, for customers operating in the wine, chemical, petrochemical, food, pharmaceutical and hydroelectric industry.

The company's core business consists of:

- standard flanges -according to Uni, En, Din, Ansi regulations
- special and custom flanges
- wine sprayers and washing systems
- support feet (custom designed)

The supply chain of each item is guaranteed with the identification of heat that is imprinted on each product.

The main strengths of Ginox are flexibility and promptness of delivery, traceability and wide availability of raw materials (well-stocked warehouse), full control over the internal manufacturing process. The range of products is completed with the commercialization of welded and seamless tubes, laminated and forged round bars, rectangular sections and sheet metal.

The company's production is conforming to the European M.O.C.A. regulation regarding food suitability (Reg. CE 1935/2004). M.O.C.A. products can easily be recognized by the symbol of food suitability (glass and fork) engraved on the article.

Ginox is growing every year with new investments in technological machines and know-how of the team and, thanks to its reliability, can count more and more customers both in Italy and abroad.
