

AERPURA

> More about AERPURA

AIRQM offers IAQ solutions to all types of air contaminants such as particulate, odors, and volatile organic compounds, biological contaminants.

AIRQM is an "Air quality Manager", the reference point for more correct air management. Air is often poor indoor due to high outdoor pollution, especially in urban areas. The proposed solutions allow to purify the air in a green and effective way.

AERPURA mainly operates in smart manufacturing, cleantech, health & wellness, and agri-food.
