## > More about GIOVANNI CANE

Our company has been operating in the bakery sector for over 50 years. Our business is represented by bread substitutes: GRISSINI and CRISPBREADS that we produce in many forms, genres and tastes; conventional and organic.

We are a small family-run artisan company. Respect for traditions and the constant search for high quality have allowed us today to be a small, but consolidated reality within the great world of bakers. The attention to detail is an important and essential value for our production. Our target is to produce a high quality product with an eye-catching packaging.

We work a lot to choose the best grains available and to create a new packaging, which would be attractive to consumers, be transparent inside and, at the same time, be easy to use as the packaging keeps standing even if you open it.

From the choice of raw materials to the control of the finished product, every baked package has been checked carefully and precisely.

# GIOVANNI CANE

Knowing how to renew a timeless product like breadstick with artisan skill has allowed us to achieve great success as a recognition of the artisan excellence of the Piedmont Region.
