PASTA NATURA SRL

> More about PASTA NATURA SRL

'Directly from the seed to your table' is PASTA NATURA's slogan: production of Piemonte supply chain products KMO with naturally gluten free ingredients. Our gluten free pasta is born from the passion of the good food of the Italian culinary tradition and from the desire to discover new tastes.

The mood has been 'let's focus on what we can eat and not on what we can't eat'. By adding water, it is possible to obtain highly digestible, nutrient, protein, low glycaemic index, whole and healthy product. The bronze drawn creates a rougher product with exceptional cooking performance, thanks to the slow drying process at low temperatures, preserving organoleptic and nutritional properties, and keeping the natural raw materials colour and taste.

Legumes pasta, whole grain pasta, gourmet pasta obtained from bamboo shoots and summer truffle are some of the types we offer.

Our packaging is 100% recyclable and biodegradable thanks to the possibility to divide the paper from the polypropylene.
