> More about BIEMME

Since years we import, produce and distribute Organic products from grains and tubers, ingredients for the bakery and the confectionery industry, as flours, grains and sweeteners. In particular, we offer a wide range of sweeteners, obtained from cereals or tapioca.

Food consulting and support

Experience and professionalism allow us to always pay attention to our customers' needs. Furthermore, we offer advice to find the most suitable ingredients for all customers' productions and consulting service in new recipes creation.

Customization

Thanks to our experience along with the dedicated update we can supply tailor-made products to customers, according to their requirements. The flexibility of the production plants and of our recipes allows us to adjust or customize our sweeteners to the customers' requirements, complying with the Organic production regulation.
