> More about Primavera Foods Farm

Primavera Foods is a company that grows 100% Italian rice and cereals.

To obtain quality products you need an excellent raw material and that's why Primavera Foods is located in the Vercelli area of Northern Italy renowned for its rice fields.

Since the mid-1800s we have been cultivating the lands of Cascina Aramino, whose origins and fame date back to Roman times.

Today the fifth generation of rice growers continues to select the best beans, respecting the territory, combining the techniques handed down over time with the most cutting-edge technologies.

Our products are not limited to recipes from the splendid timeless Italian regions. We like to innovate our proposal with ever new, healthy, curious recipes, studied with the help of nutritionists and a dedicated R&D team.

Our aim? Simply amaze the palate with the best rice.
