> More about Wiseside srl

Wiseside is an innovative company in the field of Cloud-IoT services, supporting the Digital Transformation of complex ecosystems such as modern supply chains. The collaborative and interoperable solution created by the company, based on GS1 standards, offers complete and detailed visibility of processes, ensuring product traceability throughout the entire supply chain.

The company actively collaborates with various academies and research centers, particularly with the Links Foundation (Research Center of the Politecnico di Torino), to ensure innovative solutions. With a customer-centric approach and a constant commitment to digitally interpreting the actual needs of clients, Wiseside provides advanced services and systems based on evolved methods and technologies (A.I./Computational Intelligence) that offer a competitive and distinctive advantage.
