## > More about IRES SOCIETA' A RESPONSABILITA' LIMITATA

IRES srl is a company specialized in the development of new rice varieties and in the development of controlled production chains, from the field to the dish, with the aim of always providing new opportunities for the market.

IRES srl produces and sells seeds of its varieties throughout Europe and in surrounding countries such as Morocco, Portugal, Spain, France, Italy, Greece, Bulgaria, Romania, Turkey, Ukraine and Russia.

IRES srl collaborates with the main national and international institutions such as IRRI, International Rice Research Institute.

Our varieties, in addition to being innovative, are developed through "green breeding": a new approach for the development of more sustainable rice varieties that requires less fertilizer, less chemicals and less fungicides.
