> More about RISERIA CERIOTTI SRL

Riseria Ceriotti is synonymous with RICE: Research, Innovation, Selection and Origin.

RESEARCH: Continuous studies and research allow the rice mill to obtain an unrivalled finished product.

INNOVATION: Storage is state-of-the-art, thanks to newly designed silos that allow the raw material to be stored in the best possible way. The rice is stone milled and water polished. Sophisticated optical sorters ensure the quality and integrity of the final product, which will retain its fragrance in the vacuum pack.

SELECTION: The selection of the raw material is the most important stage of the entire process and is fundamental in order to be able to offer a product of excellence. This is why the family takes care of it personally.

ORIGIN: The land and the soil contain the origins of our history, our successes, the secrets of our quality.
