> More about CASCINA BELVEDERE

Cascina Belvedere is a farm of 200 acres situated in the North of Italy.

Here we follow the entire process: from the selection of the seeds and the harvest to the packaging in the farm, including the distribution.

A scrupulous selection of the seeds allows us to produce an extra quality rice: that means that our rice contain only 1/3 of the total shortage fixed by law.

This method takes place not only for conventional production, but also for the organic one; in fact Belvedere is organic certified.
