> More about ECOMACCHINE

ECOMACCHINE was founded in June 1976 by Mr. G. Eva and Mr. E. Cavallero, Managing Director and Site Manager of CASTAGNETTI & C., international engineering and contracting company, with the aim of specializing in making equipment and components for primary water, industrial or municipal wastewater treatment plants.

ECOMACCHINE has been qualified to be an official supplier by some of the main petro-chemical companies in the world, as for example Petrola, Technipetrol, AMOCO, ENI and SAIPEM, with a quality control plan certified by FOSTER & WHEELER since 1983.

Today ECOMACCHINE is one of the most important companies of this sector in Italy and it is well known and valued in many countries in Europe, North Africa, Middle East, Central and South America, Australia and New Zealand.

ECOMACCHINE directly exports more than 70% of its products and the company collaborates with most of the Italian Contracting companies working abroad.

ECOMACCHINE has written its own quality system since 1997 that has been certified by TÜV since 2003.

ECOMACCHINE Key Features are: Flexibility, Quality, Innovation, Customer support.
