> More about CASIT

CASIT - **automation systems for control and management of gates, industrial doors, barriers and openings.**

In operation since 1954, Casit's made significant technological advances over the years by constantly improving the production pipeline, the systems performance and the security standards to make the products work perfectly in every climatic environment and activation frequency. The aim is to make products extremely long lasting and reliable in order to provide the best solution, even for tricky and impossible projects.

We are manufacturers and we proudly confirm that **"Made in Italy"** is the main feature of our product range and complementary accessories.
