

FACO

> More about FACO

Since 1963 FACO is a company specialized in engineering and supplying of custom made **heat exchangers, radiators and condensers** for air-conditioning, refrigeration and industrial applications. Its flexibility in design and production combined with its commitment to quality and integrity has made FACO the reference partner for demanding and challenging projects in fields as Oil & Gas, Offshore, Power, Nuclear Power, LNG, Naval, industrial processes and air conditioning applications.

Competence and experience backed by the thermodynamic R&D Lab and its in-house numerical analysis capabilities, allow FACO to deliver the most effective and efficient solutions to its partners. Numerical analysis range from CFD to noise, vibration, blast, shock, seismic assessment and structural FEA according Eurocode and ASCE.
