> More about ONLECO SRL

ONLECO operates in the market by providing consulting services with high know-how such as engineering companies, professional offices, public and private institutions.

Over the years the company developed skills in the areas of acoustics, energy and the environment.

Thanks to the participation in important research and consultancy activities with public and private bodies, universities and companies, the company gained stable experiences and collaborations aimed at expanding and improving his services, through an approach aimed at encouraging and developing supply chain activities.

ONLECO operates in order to offer its customers an increasingly qualified, up-to-date and complete support, with great attention to market dynamics and respect for the environment.
