> More about SFERASOL

SFERASOL S.r.l. is divided into two brands. "SFERASOL ECOLOGY" deals with the treatment of sludge, water and produces also equipment to realize complete dewatering plants. Leader in the production of belt presses, the Company's core business. "SFERASOL ECOLOGY" has a new technology to remove solids, heavy metals, organics and inorganics and oil. Now recycling of industrial waters is real. "SFERASOL ENERGY" is a business idea linked to the Sferasol™ product, a spherical solar thermal collector, the only one in the world with an international patent.

Sferasol™ has revolutionized the idea of "RENEWABLE ENERGY", by inventing a product at a time functional, innovative, high quality, good looking, and most of all easy to install as a washing machine.
