> More about PETRAL

PETRAL is an Italian raised flooring company initially born as an evolution of the INTEC S.p.A. Contract Division. Since 2004 PETRAL operates as an independent company with the purpose to develop and produce innovative raised flooring systems. During the years PETRAL has specialized in the production of **raised floors for indoor and outdoor** through the development of new technical solutions and the use of new materials such as Brickstone and Bricktile.

PETRAL raised floor is a system composed of modular panels placed on special supports adjustable in height. This system allows for the creation, underneath the floor, of a plenum that can be used for the cables and pipes to pass through.

PETRAL staff has years of experience in the field of raised floors. PETRAL stands out for the quality-oriented research and innovation by offering advanced solutions for raised floors: BRICKTILE raised floors, as well as more traditional systems such as calcium sulfate and chipboard. PETRAL today represents innovation and quality "Made in Italy" recognized and appreciated around the world.
