> More about FERREROLEGNO

FerreroLegno is a completely Made in Italy company specializing in the production of doors and interior closure systems, recognized for the uniqueness of materials and the care with which they are designed and built. Key elements for over 70 years include: design, sustainability, expertise, high product quality, meticulous attention to details, and technological innovation. In FerreroLegno, the door is interpreted as a connector of spaces that evolves according to lifestyle needs: from modular glass systems to minimalist flush-to-wall doors, to modern hinged or sliding doors, to space-saving solutions that enhance any space, thus creating infinite combinations and customizations in terms of materials - wood, laminate, and glass - finishes, and dimensions, giving life to aesthetically coherent and functional spaces, characterized by strong coordination and design freedom. The company also stands out for a pronounced attention to sustainability, starting from the choice of materials to virtuous production processes.
