> More about G2 Misuratori S.r.l.

G2 MISURATORI S.r.l. since 1997 manufactures cold, hot water meters, single, multi jet, dry, wet and liquid filled sealed counter dials, Woltmann meters, heat meters and components for metering systems with special focus in supplying Water Supply and Distribution Companies.

About 25% of our production is exported to Europe, America, Africa and Middle East.

Achievements:

- MID approval (module D and B) according to Directive 2014/32/EU.

- Quality and Environmental Management System Certification in accordance to ISO 9001 and ISO 14001, issued by DNV - Det Norske Veritas.

- The components in contact with water according to European Directive 98/83 CE also known as DWD (Drinking Water Directive) converted in Italian Law D.M. 174, 06/04/2004

 - Internal Laboratory in evaluation by ACCREDIA according to ISO/IEC 17025.

Our mission "the Value of Measure", is well represented by the metrological performances extending from R80 to R500 Horizontally, R160 Vertically; Environmental class from: - 25°C to 70°C.

G2 Misuratori S.r.l.

In order to meet the market needs and continuous technological evolution, we have developed Sensors for remote reading (Inductive, Hall, Reed) to be combined with radio systems in frequencies 868Mhz - 169Mhz and protocols as W-Mbus, Lora, Sigfox.

Our production is Made in Italy with components of EEC origins.

Our continuous efforts in research and development is aimed to assure the highest quality standards and expertise in production and in customer service.
