> More about intereco

INTERECO, since 1978, manufactures belt presses and now we have become leader in this kind of production thanks to EDOM and CAB series. Today we have already sold more than 1.000 models worldwide.

With our team of qualified engineers and technicians, the know-how achieved after long intensive studies and research of wastewater treatment plants, INTERECO is also manufacturing complete UF and RO plants and a particularly electrocoagulation system.

The filter belt presses of the EDOM series are well known as hard working machines at very competitive cost. The production program is filled with the complete series of unit necessary to install a turnkey dewatering plant, such as polyelectrolyte preparation units, belt and screw conveyors, cake lime double screw mixers, rotating and dynamic thickeners, gravity filtering table and sludge dewatering compact plants on skid.

INTERECO has the main primary objective of the satisfaction of our customers. Little company but dynamic and innovative, we work every day to improve quality and reduce cost.
