

Wave For Energy

> More about Wave For Energy

Wave4Energy is a Spin Off of Polytechnic of Turin, founded in 2010 and based in Turin.

Wave4Energy is the company leader in the design and realization of systems that produce energy from the movement of the sea waves.

The team of Wave4Energy has 7 engineers with mechanical and aeronautical formation, all experts in analysis and design of mechanical systems, and mechatronics.

The company aims to bring academic knowledge to the industrial sector and to propose innovative solutions in the clean technologies field.
