> More about GV Filtri Industriali

GV Filtri Industriali has more than 30 years of experience in the design and production of industrial filters. National and international customers use every day our excellent quality products for various filtration areas such as Oil and Gas, Chemicals and Petrochemicals, Water Treatment, Power Generation, Food and Pharma, Industrial.

Great attention to quality and ongoing investment in training are the basis of our solidity.

We usually study filters together with our customers to understand their needs and find the best solution they can adopt. Research and development of new products and technologies allow us to satisfy all special application needs. We constantly invest in training and our qualified staff can find the best solutions for both filter materials and applied technology. Each of our products is customizable and designed to meet every customer's filtration needs.

GV Filtri Industriali

We love to be called “filter artisans” because we follow our products one by one from design to production. Passion and ethics for what we do offer our customers a complete service. Internal production allows us to create filters for every kind of application. All our filters are designed and manufactured in accordance with all international standards.

GV Filtri Industriali mainly operates in the cleantech, agrifood, health & wellness, and smart manufacturing fields.
