> More about Etneo Italia

The company main division is active in soldering solutions for automotive and microelectronic and electrical industry. The experience of Etneo, in the field of welding, consists in creating solutions with a high level of customization to satisfy the customer request, some examples are automatic soldering robots cells or semi automatic soldering lines.

The Smart Energy division is focused 100% in renewables and use of hybrid solutions: solar, wind and battery storage. This company is engaged in the development of 3 types of projects: smart furnitures, smart poles, smart wind turbines. The smart vision relies on what we can do to reduce carbon foot print in Smart cities developing projects.
