> More about i-TES

i-TES is a Start Up Company that develops innovative thermal storage solutions using phase-change materials and offers advanced energy services and energy efficiency measures mainly based on performance-based contracts as an ESCO provider. The competitive advantage offered by i-TES is linked to an ever-increasing knowledge of PCM systems, coupled with a decennial experience in energy management in final uses. i-TES mainly deals with applications whose temperature ranges vary from 5°C to 80°C.

The laboratory and engineering team is responsible for making the product in full compliance with the ISO9001:2015 standard for quality protection. The management team assesses marketing, strategic and economic feasibility.
