

EOLART 2.0

> More about EOLART 2.0

Eolart 2.0 Srl is a company born from the sharing of knowledge, skills and experiences of a group of companies and professionals already working in the field of small wind energy from several years and able to cover all stages of the production chain with great added value.

The knowledge and skills of the staff, the network of strong partnerships that EolArt 2.0 has formed—with research centers for product development, developers and system designers, specialists for monitoring installed turbines, professionals for presale services, and maintenance companies for after-sales and support—are such as to offer the customer a complete and reliable service, thanks to a professional structure which brings together their complementary skills.

EOLART 2.0

Eolart 2.0 is headquartered in Naples and here also focuses throughout the design, sales and customer care. The administration and the production plant are in Villanova Mondovì (CN) where the turbines are built, towers are built by CMB Sas, partner of 2.0 Eolart in Boves (CN). At the end of fittings and assemblies, each turbine, with its control cabinet exceeds a bench testing and is CE certified.
