## > More about GRINP SRL

GRINP is an Italian innovative company founded in Turin. We are leader in atmospheric plasma technology thanks to our qualification in designing and manufacturing resource-efficient systems based on proprietary plasma technology: we develop both laboratory and industrial scale machinery. GRINP Plasma Technology unlocks the development of sustainable processes in several fields:

textiles, reducing water, chemicals consumption and costs;

environmental, decontaminating polluted air and water;

plastics, enhancing surface properties for automotive, packaging, flexible electronics and photovoltaic applications

Our ongoing R&D&I efforts to offer disruptive solutions that cater to customer needs are based on three key concepts: innovation, performance, sustainability.
