

BD AUTOMATION S.R.L.

> More about BD AUTOMATION S.R.L.

BD AUTOMATION is a new reality that proposes itself in the **Utility Management & Infrastructures market** segment as an ideal partner for software engineering and development activities for PLC and for architectures engaged in supervision and control.

BD AUTOMATION aims at companies that design and build electrical systems in the tertiary, civil and industrial sectors that delegate or plan to outsource the development activities of their control and monitoring systems.

The company can provide a series of specific skills in the **design and development of hardware and software architectures for control and supervision**, based on PLC / PAC and SCADA platforms. The activities and services that are proposed adapt to the specific needs of customers.
