> More about VISCONTI MARCO

MVarchitects deals with design and sustainability in architecture for tertiary, industry, education and culture. In response to the environmental emergency, the group creates an architecture motivated by respect for nature and from interpretation of the new cultural needs related to the changing needs of man. MVarchitects is a multidisciplinary creative workshop where architects and engineers pose the bioclimatic passive key at the base of their work. Fundamental characteristic of their projects is the search for the best relationship between man and nature in a logic of use and understanding of the surrounding environment.

Among the achievements, the industrial complex Fiat Melfi; computer centers for Railways in Mestre and Palermo, the Iveco training center in Turin, the training center in Lecce Hitachi; showrooms for cars in Berlin, Paris, London; the halls Mechanics, Painting and Restaurant for Ferrari in Maranello; the conference room of the automobile museum in Turin; the building services of the circuit of Mugello; the Zucchetti Office Tower in Lodi; the Fiat Design Center in Betim, Brazil.
