> More about Peter Jaeger Architetti

Peter Jaeger architects is an architecture laboratory where, in over 15 years of practice, an innovative working method has been developed by the experiences gained abroad.

International projects and the collaboration with JKP Architects have introduced in our work a high degree of art and craft that affirms the transformative power and responsibility of architecture to improve the quality of the communities in which we work and live.

Peter Jaeger architects provides customized strategies to meet and exceed client needs.

For us, the highest level of architecture is possible when we have earned the respect and satisfaction of our clients and entered into a relationship that we expect to endure throughout the design, construction process and beyond.
